Project 10 is funded by the University of South Florida St. Petersburg through a grant by the Bureau of Exceptional Education and Student Services, Florida Department of Education (2010-2011, 291-2621A-1C008).

## Our Mission

The mission of Project 10: Transition Education Network, hereinafter referred to as “Project 10,” is to assist Florida school districts and relevant stakeholders in building capacity to provide secondary transition services to students with disabilities in order to improve their academic success and post-school outcomes.

# About Project 10: Transition Education Network

## Project 10: Transition Education Network

- Project 10 is Florida's statewide discretionary project supporting the secondary transition of youth with disabilities.
- It is funded by the Bureau of Exceptional Education and Student Services (BEES), within the Florida Department of Education.
- Project 10's primary charge is to assist school districts in providing appropriate planning and timely transition services and programs to assist youth with disabilities in their transition to adulthood.
- Project 10 also serves as a collaborative resource for other state agencies, discretionary projects, non-profit organizations, and families in the provision of transition services for students served in exceptional student education.
- Project 10 utilizes regional personnel, an extensive collaboration network, and data-driven accountability to deliver services, supports, and information to all stakeholders focused on improving post-school outcomes for students served in exceptional student education within Florida.
- 21st Century technology is used for on-going electronic communications via a transition listserv, "Transition Wheel" topics, the Project 10 Website, and timely products and updates on transition issues.
- Project 10 provides support to the State Secondary Transition Interagency Committee and District Interagency Councils. It also produces a number of products, supports pilot transition activities across the state, provides training and technical assistance services, and develops research-supported activities.

## Project 10 Pilot Transition Sites

- Project 10 funds and supports pilot transition sites across Florida. These sites implement evidence-based or promising practices designed to improve academic success and postsecondary outcomes of youth with disabilities.

## Project 10 CONNECT

- Project 10 funds and supports district level interagency councils with the mission of improving collaboration between school districts and community agencies in the provision of transition services for youth with disabilities.

## Project 10 STING RAY

- Project 10, in collaboration with the State of Florida Governor's Commission on Disabilities and the Florida Department of Education, will support the development and implementation of pilot postsecondary, on-campus programs for youth with significant intellectual disabilities: Students Transitioning Into the Next Generation, Recognizing Alternatives for Youth (STING RAY).

## Project 10 is currently focusing on four major initiatives:

- Capacity building to implement secondary transition services
- Interagency collaboration
- Transition legislation and policy
- Student development and outcomes

These initiatives will help provide the training, technical assistance, and resources for personnel throughout the state who are working to improve the future success of students with disabilities.
